

Education Programs

The Peaks of Otter SWCD engages in numerous adult and youth educational programs each year. The focus of the District's educational activities is soil and water conservation. Most activities include some educational instruction on how individuals can implement best management practices (BMP's) and conserve natural resources. Educational programs are conducted on a request basis and as time and funding permit.

Please contact the District office to inquire about a program or find out more about the following educational offerings. You can also click on each link below to be taken to that site's page.
